Swimming pools: **Never ever leave children you can't swim on their own. You always must have an eye on them. Swimming pools are dangerous for people who can't swim**

Water: The water on Majorca is scarce. Please, pay attention while showering to the fact that you waste no water. The tap water is drinkable, however, tastes very much of chlorine or salt, so that the coffee or tea are better prepared with bought water.

Waste: If you spend your vacation in a village house, three times a week the garbage disposal goes past with you. Put your garbage well tied outside your door (the previous evening, orientate yourselves by your neighbours). If you live in a villa take your garbage in the green garbage containers on the street. You can separate paper, plastic and bottles.
